

Introducing the Split System Controller

Heatcraft Worldwide Refrigeration introduces an innovative walk-in cooler controller solution to provide improved defrost control.

The new Split System Controller combines three mechanical components into one electronic solution to reduce defrost complexity; providing restaurant and business operators with a simple, reliable and flexible solution.

Features of the Split System Controller

Simple

- Preprogrammed with parameters suited to your environment
- One controller for all operating temperatures
- Wiring eliminated to condensing unit, reducing install time
- Easy to read LED display

Reliable

- Remote monitoring and control capability to improve defrost performance
- 66% reduction in required defrost components
- Built-in alarm and error code options

Flexible

- Factory installed or field retrofit solution

Monitor Your System

The Split System Controller allows you to access, monitor and control your refrigeration system remotely using the power of the Heatcraft Remote Refrigeration Control (RRC), our Internet-based controls system.

Simple. Reliable. Flexible.
